

# What topics should get on the CSB agenda?

Extending the archive further for gridded data that isn't generated in FEWS

Web based FEWS

Active Directory support (and fall back in case of emergency)

Password protected web access to dynamic web reports

Web based FEWS

Better support for alerting and automated quality control.

What does it mean for decision makers in the end

Security meets standards of external users.

Impact based forecasting

A worldwide community

# What topics should get on the CSB agenda?

Python integration.

Integration with other environmental data visualisation and analysis systems.

One (maybe two) click install of server and client systems. Maybe latest versions cover this

Comes with Python interpreter (probably only CF specific)

# How do you want to provide input for the CSB?

I trust Justin :)

Built-in APPS for easy grab and use

A Microsoft Teams page where we can post ideas, create polls and collaborate

I think a meeting of Australian users before CSB meeting to raise any issues

pre-meeting ahead of the CSB - but something that does not take too much effort.

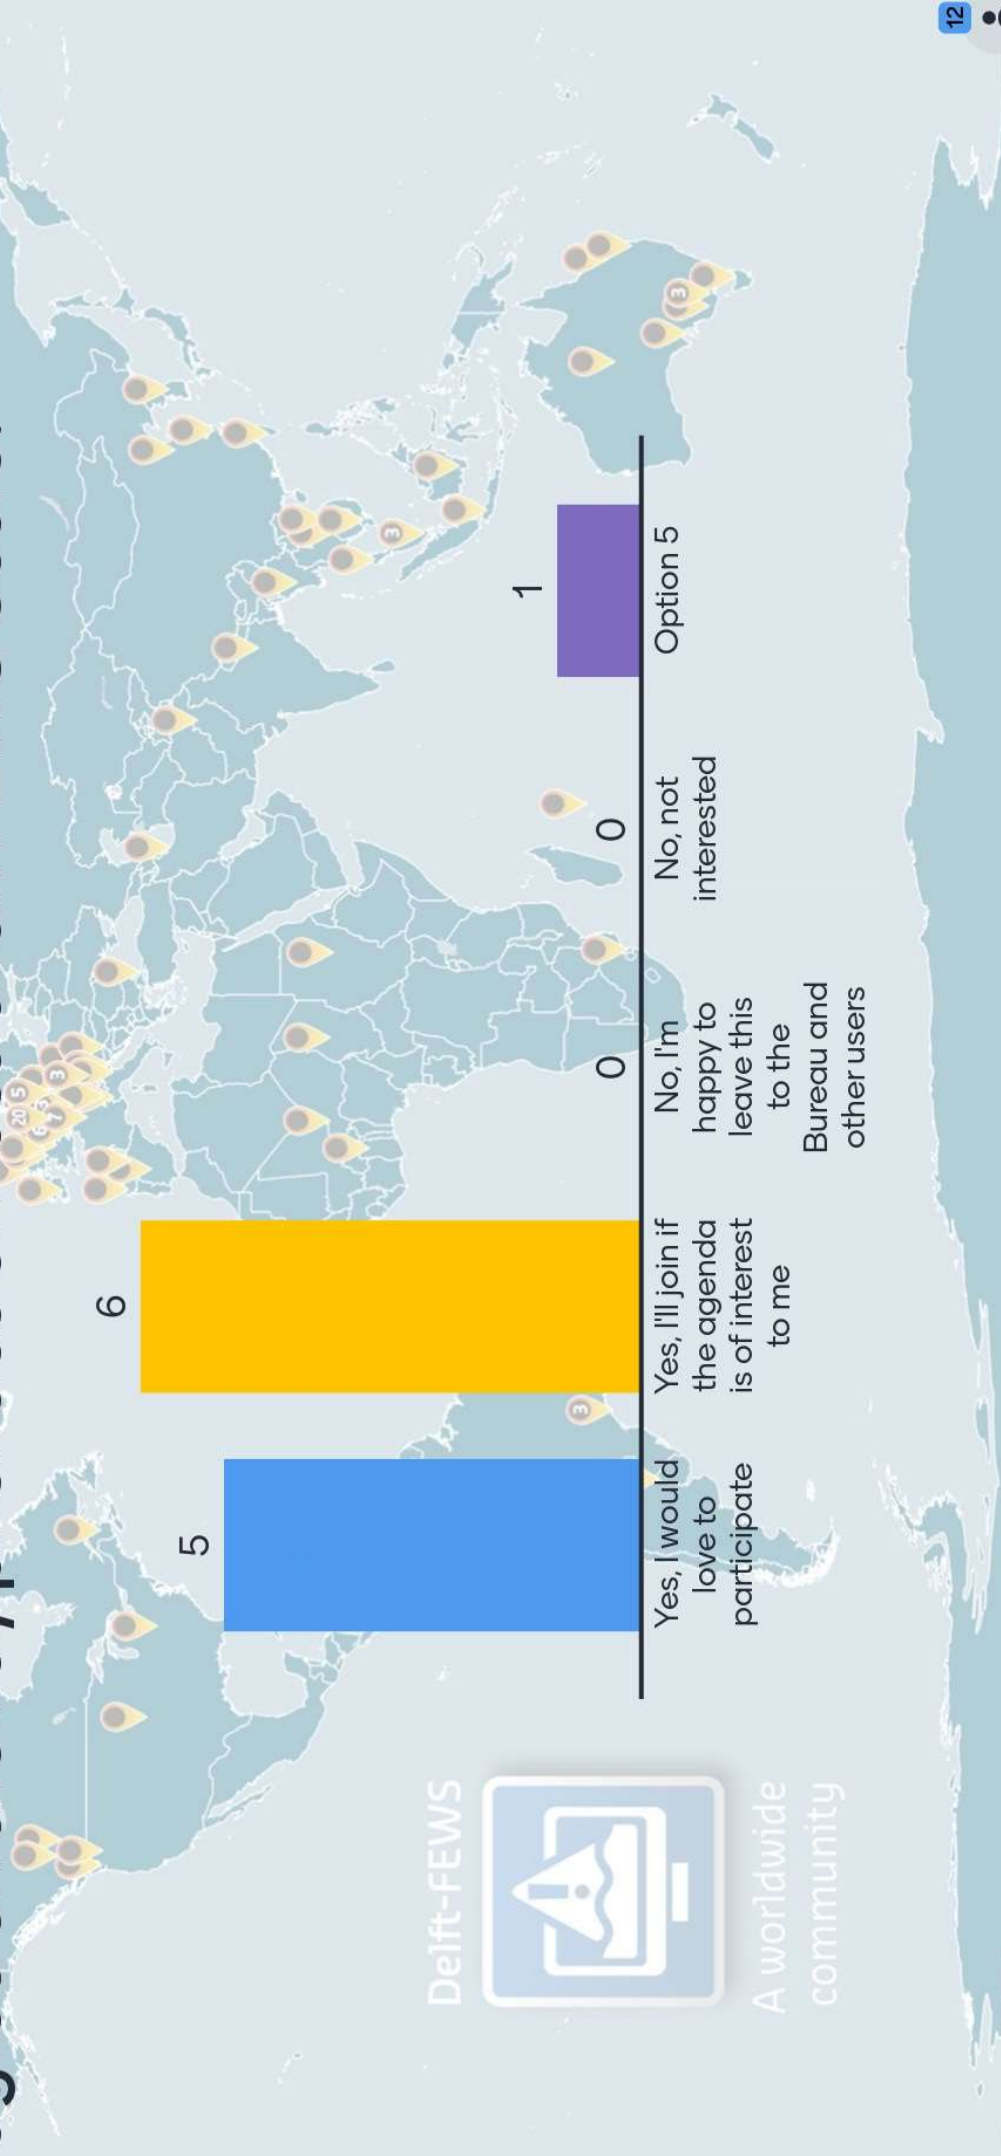

User workshops

Can we have an Australian CSB
